

Instructions for Use

Engineering Changes Affecting Maintainability- MOD Form 704B

1. MOD Form 704B is used to record significant engineering changes which affect aircraft/equipment type maintainability and need to be readily available to maintenance personnel.

Examples:

1. A permanent repair has been embodied which affects the content of Scheduled Maintenance.
2. An in lieu item of equipment is fitted which affects the fwd/depth line maintenance of the aircraft/equipment type.
2. Entries are only to be made following authorization from the EA of the relevant IPT.
3. MOD Forms 704B are to be inserted and removed from MOD Form 700 in accordance with instructions for controlled forms on MOD Form 799/1.
4. To record an entry on MOD Form 704B, the MOD Form 700 Co-ordinator or NCO IC Engineering Records is to enter:
 - a. The reference of the EA authority.
 - b. The title of the change.
 - c. The effect that the change has on aircraft/equipment type maintainability.
5. To remove an entry from MOD Form 704B:
 - a. The MOD Form 700 Co-ordinator is to transfer the entry from MOD Form 704B to MOD Form 707A.
 - b. The Maintenance Work Order Co-ordinator is to:
 - (1) Co-ordinate the entry on the Maintenance Work Order when all work necessary to remove the entry has been undertaken.
 - (2) Enter the SNOW which cleared the work in the 'Removal' block of MOD Form 704B, and print their name.
