MOD Form 755(MS) Series

MOD Form 755(MS) Series

1. **Introduction.** This form details the Instructions for Use (IFU) for the MOD Forms 755(MS) Series, contained within the Manual of Airworthiness Maintenance-Documentation (MAM-D) Part 2, that are used to maintain configuration control of the modules in the Modular Support (MS) Storage and Transportation System.

2. **Reference(s).** This form refers to the following instructions/publication(s):

    a. RA 4258 – Modular Support (MS) Storage and Transportation System.

    b. MAM-P Chapter 0.5 – Commonly Used Information.

3. **Applicability.** This form is applicable to Stns/Ships/Units in the Military Air Environment that fall within the scope of the MS project authorized to use MS to support Sqns/Units engaged on embarked operations.

MOD Form 755(MS1)

4. **MOD Form 755(MS1) – Modular Support Stores Demand Log** – is used to maintain a record of spares demanded from WSS ATF PO 3. It is important; that where spares are demanded to enable a repair or the embodiment of a modification authorized by WSS ATF PO 3, that the cross reference to a MOD Form 755(MS5) serial number, see **Para 9** is completed. MOD Forms 755(MS1) should be used in association with MOD Forms 755(MS1A)(Spares), see **Para 5.**

MOD Form 755(MS1A)(Spares)

5. **MOD Form 755(MS1A)(Spares) – Modular Support Spares Demand** – is used to demand spares. Completed forms must be sent directly to WSS ATF PO 3. Sqn/Unit Modular Support Controllers (MSCs) should input their details and complete all columns, especially the reference to AP 119G-1602-3. The forms may be used to make demands for different items by ruling off under each demand line. MOD Form 755(MS1A)(Spares) should be used in association with MOD Form 755(MS1), see **Para 4.**

MOD Form 755(MS2)

6. **MOD Form 755(MS2) – Record of MOD Forms 755(MS3)/MS4)** – is used by Sqn/Unit and Typed Air Station (TAS) MSCs to record the raising and movement of MOD Forms 755(MS3), see **Para 7,** and MOD Forms 755(MS4), see **Para 8.** It is important to record the latter forms' unique serial numbers and to complete cross-references to MOD Forms 755(MS5) serial numbers.

MOD Form 755(MS3)

7. **MOD Form 755(MS3) – Report of Faulty Module and/or Interior Furnishings** – is used to report faulty and unsatisfactory aspects of modules or their interior furnishings. Each MOD Form 755(MS3) must be allocated a unique local serial number, eg MS3/VL/801/001. Standard Unit/Location Codes are detailed in MAM-P Chapter 0.5. In order for WSS ATF PO 3 and the Defence Packaging Authority (D Pkg A) to manage fault trends it is important that **Fields 1 to 6** inclusive are completed as fully as possible. If thought necessary, appropriate cross-references to AP 119G-1602-3 should also be added. Completed MOD Forms 755(MS3) must be sent, via the TAS MSC who must add appropriate comment, to WSS ATF PO 3 who must investigate the reported fault and respond on MOD Form 755(MS5), see **Para 9,** detailing what action, if any, is authorized.

MOD Form 755(MS4)

8. **MOD F755(MS4) – Proposed Amendment to Module Internal Configuration** - is used to report proposals to add or delete items of Aircraft Servicing and Support Equipment (ASSE) to/from modules due to the introduction into service of new or modified ASSE, or for modifications to the internal configuration of modules. Each MOD Form 755(MS4) must be allocated a unique local serial number, eg MS4/VL/801/001. Standard Unit/Location Codes are detailed in MAM-P Chapter 0.5. In order for WSS ATF PO 3 and the D Pkg A to maintain configuration control **Fields 1 to 9,** as appropriate, must be completed as fully as possible. Completed MOD Forms 755(MS4) must be sent, via the TAS MSC who must add appropriate comment, to WSS ATF PO 3 who must investigate the proposal and respond on MOD Form 755(MS5), see **Para 9**, detailing what action, if any, is authorized.

MOD Form 755(MS5)

9. **MOD Form 755(MS5) – Amendment to Module Internal Configuration** - is used by WSS ATF PO 3 to notify Sqn/Unit and TAS MSCs whether repairs, modifications, or amendments to module internal configurations are authorized or not. The receipt of MOD Form 755(MS5), and in particular the MOD Form 755(MS5) serial number, must be recorded by the TAS and Sqn/Unit MSCs on MOD Form 755(MS2) and MOD Form 755(MS6), see **Para 10,** and on MOD Forms 755(MS1) and 755(MS1A)(Spares), if spares are required see **Para 4.** Actions authorized on MOD Form 755(MS5) must be complied with within 2 months of receipt of spares. Compliance must be reported to WSS ATF PO 3 by the Sqn/Unit MSC via the TAS MSC using the tear off slip at the bottom of MOD Form 755(MS5). The serial number of the MOD Form 755(MS5) must be inserted.

MOD Form 755(MS6)

10. MOD Form 755(MS6) – Record of MOD Form 755(MS5) Embodiment
– is used by Sqn/Unit and TAS MSCs to record the movement of MOD Forms
755(MS5) and cross-refer to MOD Forms 755(MS3) and 755(MS4).
